**Report only those programs for which a license or other similar examination is required before students can qualify for employment in their chosen field of study, and where there were at least 10 students who completed the program in the designated year.**

Our institution has programs that meet these conditions.

**For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2021-2022 job placement rate will be the number of students who completed the program in 2020-2021.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2020-2021, you do not need to report a job placement rate for 2021-2022. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 19.**

Our institution has programs that meet these conditions.

### 20. Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).

Transfer data for 2022-23 is partially incomplete. Does not reflect spring 2023 counts from UC, which are not yet available.

For licensure rates, programs with a ZERO licensure rate in 2022-23 have data that is still pending. For the Cardiovascular Technology rates, two identical licensure names were entered that designate two different tests where the student has a choice of which to take.

For Employment Rates, rates from Perkins Core Indicator data was used.
