## Introduction

This page is left intentionally blank for printing.

## Introduction

The OCC Atlas was designed to provide pertinent information about Orange Coast College's students and the surrounding community. The nineteenth edition of the OCC Atlas contains information commonly requested about OCC and its services, staff, students, and student outcomes. It is intended to provide a common and reliable base of information that can be used for general information, grant writing, program review, professional conference presentations, and the generation of institutional effectiveness trends and indicators. The OCC Atlas is arranged into six sections: Environment and Access, Credit Student and Enrollment Trends, Non-Credit Student Trends, Student Outcomes, Student Equity Outcomes, and Employee Data.

## OCC Atlas Highlights (2021-2022)

- Environment and Access: Information details the extent to which Orange Coast College (OCC) is serving cities and high school districts within the Coast Community College District's (CCCD) boundaries.
- Over the last 10 years, OCC students have become more ethnically diverse than the CCCD service area. The Hispanic or Latinx population continue to be the ethnic/racial group with the highest proportion of students at OCC. (See section I.1)
- The proportion of students from outside of the college's official service area has grown over the last 10 years and now makes up about $50 \%$ of the enrollment. (See section I.3)
- Credit Student and Enrollment Trends: Information is provided on credit student demographic and enrollment trends.
- Headcount and seat count reached a peak in fall 2011 and have been trending down. In fall 2021, headcount decreased by $9.1 \%$ and seat count by $4.2 \%$. (See section II.1)
- OCC's student population has become younger and more ethnically/racially diverse over the last ten years.
- The Hispanic or Latinx group has been the fastest growing ethnic/racial group over the past ten years, increasing from $28.1 \%$ in fall 2011 to $34.1 \%$ in fall 2021. Based on projection data, this trend is expected to continue. (See section II.3)
- In 2011s, the under-25 population was $71.8 \%$. Fall 2021 students under the age of 25 comprised $71.8 \%$ of the population while 25 to 30 age students have decreased to $14.7 \%$. Most of the other age groups (31 and older) have correspondingly increased over the last ten years. (See section II.4)
- Prior to fall 2006, females were the largest gender group among students at OCC. Since then, the proportion of males has decreased, and in fall 2021, it stood at $47.4 \%$. (See section II.5)
- The percentage of OCC international students has increased over the last 10 years and now stands at $5.2 \%$ (See section II.7)
- The majority of OCC students continue to indicate their education goal is to transfer to a four-year institution ( $60.8 \%$ in fall 2021). However, this percentage dropped from the previous semester and the percentage of vocational educational goals increased. (See section II.12).
- The proportion of students with full-time status (12 units or more) has been slightly decreasing over the last few years and stands at $27.3 \%$ in fall 2021. (See section II.14)
- The COVID-19 Pandemic has shifted course scheduling statistics therefore LIVEONLINE and Online courses are the most in-demand course modalities as of Fall 2021.(See section II.17)
- Noncredit Student Trends: New in fall 2018. Information is provided on noncredit student demographic and enrollment trends.
- In fall 2019, the noncredit program served 521 students-360 were exclusively taking noncredit courses. (See section III.2)
- Noncredit students in 2019 were more diverse and older than students taking credit courses.
- Students who identified as Hispanic or Latinx comprised the largest proportion of students ( $30.8 \%$ in fall 2021, follow by Asian/Pacific Islander (25.9\%), unknown (3.9\%) and White, NonHispanic (26.0\%)). (See section III.3)
- The majority of noncredit students were older than 30 years old. (See section III.4)
- Also, contrarily to credit student population, noncredit students are largely female (60.9\%). (See section III.5)
- A large majority of noncredit OCC students indicated that their education goal was "transfer" (40.4\%). (See Section III.9)
- Student Outcomes: Various institutional effectiveness indicators are presented. Success and retention rates are provided for the overall student population and by demographics. Success and retention rates are calculated according to the State Chancellor's Office standard definitions. Other indicators are included, such as UC/CSU transfers, AA/AS Degrees \& Certificate of Completions and probation trends.
- The percentage of ' $A$ ' grades has continued to increase, while the percentage of ' $F$ ' grades has held steady. Average GPA has been steady. (See section IV.2)
- Overall success rates have remained constant from Fall 2011 to Fall 2021 (74.2 \& 73.5respectively) and retention rates have slightly decreased in fall 2021 ( $88.6 \%$ to $87.2 \%$ ). (See section IV.4)
- The total number of Associate Degrees awarded has decreased in the overall percentage of awards ( $58.7 \%$ in 2011/12 to $46.5 \%$ in 2021/22). The addition of the AS degree in 2006/2007 and the AA/ASTransfer degrees in 2011/2012 increased the total number of associate degrees awarded and this trend has continued. In 2021-22, Orange Coast College was ranked $20^{\text {th }}$ in the state for AA-T/AS-T degrees awarded $(1,132)$. The number of Certificates of Achievement has increased substantially from 574 in 2011/12 to 2,424 in 2021/22. The majority of that increase was due to the addition of the CSU Breadth and IGETC certificates being awarded for the first time in 2014/15. (See section IV.11)
- Transfers to both CSU and UC have remained strong. Since 2011, overall transfers decreased from 2011-2019-20 then greatly increased in 2021. However, this decrease was observed statewide and OCC statewide ranking remained strong at $6^{\text {th }}$ in CSU transfers statewide, $8^{\text {th }}$ in UC transfers statewide, and $8^{\text {th }}$ in overall transfers to CSU and UC schools combined (2018/19). (See section IV.12)
- Student Equity Outcomes: OCC student data were explored by demographics across six five common indicators: Access, Retention, English/Math, and Transfer. These "success indicators" identify and measure areas for which student population groups may be impacted by issues of equal opportunity and disproportionate impact. Results varied by student group, but the following student populations experienced disproportionate impact in at least 2 of the success indicator areas: Black or African American, Hispanic or Latinx, First-Generation, and LGBT. (See Section V)
- Employee Data: Information is provided on OCC employees by demographics.
- The number of Full-Time Faculty employees has remained steady over the past ten years. (See section VI.1)
- Among faculty, there has been a shift in the male/female ratio over time toward more equitable representations by gender. The other employee groups have more discrepant representations, with females overrepresented in classified professionals ( $58.8 \%$ in 2021, but under-represented in educational administrators ( $48.3 \%$ in 2021). (See section VI.2)
- Over the past ten years, the ethnic/racial makeup of faculty and educational administrators has remained relatively stable. The majority of current (fall 2021) OCC full-time and part-time faculty are White/Non-Hispanic ( $69.3 \%$ and $62.9 \%$, respectively). (See section VI.4)
- Trends in race/ethnicity for classified professionals indicate the group has become more diverse since 2011. Similarly, the diversity of classified managers has generally increased over the last ten years, while the composition of educational administrators remained consistent with the least amount of diversity in the same time frame. (See section VI.6)
- The majority of full-time faculty are age40-49 years old, while part-time faculty are somewhat younger. Age distributions of OCC classified professionals have shifted to more staff in the 40 and above age range since 2009. Similarly, classified managers showed decreases in employees ages 40-

59 and increases in the 60 and above age ranges. The great majority of educational administrators are age 50 or older. (See sections VI.7, VI.8, VI.9)

## In Closing...

The information contained in the OCC Atlas illustrates current data and trends in a variety of areas. This information simply explains what is occurring and no inferences can be made as to why it is occurring. In most instances, we have provided a brief explanation of data trends and any other contextual information that may be helpful for the reader to understand these data. Space and usefulness to a larger audience are considered when planning and preparing the OCC Atlas. It is neither feasible nor practical to include all the volumes of information collected on OCC. The OCC Office of Institutional Effectiveness welcomes your suggestions for future publications of the OCC Atlas.

## Technical Notes

## Data Sources

The OCC Office of Institutional Effectiveness analyzed and compiled all the information presented in this Atlas. The data source(s) used are detailed for each table of information. The majority of data were compiled using the OCC Management Information Systems (MIS) data that are reported to the State Chancellor's Office (via the Coast Community College District Office) or retrieved directly from the college's student information system (Banner). A brief description of the primary MIS data files used is detailed below:

- Student Basic: The majority of demographic data were compiled from the MIS Student Basic data (such as ethnicity, gender, citizenship, educational goal, etc.). Much of these data are taken directly from the college application and are self-reported by the student.
- Student Enrollment: All enrollment data such as course, grade, drop date and units earned are recorded in the MIS Student Enrollment file. Student outcomes for success and retention rates were derived from these data. Overall, fall 2009 and forward, and Academic Year success and retention rates were determined by using the Argos Program Review Access \& Success Cube. Student assessment and placement data are taken from student assessment scores stored in Banner.
- Program Awards: Information is given on students who were awarded Associate's degrees (AA, AS, AA-T, AS-T) or certificates in a one-year period (July 1 - June 30) for summer, fall and spring semesters.
- Course Basic and Section: Semester specific information is given on courses and sections offered. Information on each course/section such as transferability, time offered, maximum/minimum units of credit, etc.

## Data Compilation

The majority of data in the OCC Atlas were manipulated and analyzed using SPSS (Statistical Package for the Social Sciences, IBM). Data retrieved from the MIS and Banner systems were extracted and manipulated using the Argos reporting tool. The output was then transferred into Excel 2019 to create the tables and charts. The tables and charts were then exported to Word 2019, at which point data interpretations were added.

## Interpreting Data Tables \& Graphs

As noted above, an interpretation is presented with each data table and graph. Such interpretations are not meant to be comprehensive, but rather meant to highlight interesting points or trends occurring in the data. In most cases, data are presented from fall 2011 through fall 2021 (fall semesters only). Some data are also presented in academic year format. This is intended to give the reader a snapshot of what is occurring. These data cannot and should not be generalized to what is occurring during spring or summer semesters.

These data are presented in terms of numbers and percentages. NOTE: Percentages are generally easier to interpret; however, there are instances when utilizing raw numbers better serves one's purposes. Both are detailed for the reader's use.

The reader needs to take caution when interpreting and using the information contained in this Atlas. The data presented are purely descriptive. It shows what is occurring but does not explain why it is occurring. Questions about the data and/or their interpretation should be referred to the Office of Institutional Effectiveness.

To be compliant with ADA 508 standards, hyperlinks will be placed at the end of this document. At the end of Section I, there is a list of hyperlinks pertaining to Economic and Education Information that are not included in the list at the end of this document.

Due to a transition in district data systems in spring 2008, certain data elements are incompatible with historical data trends and are not reported for certain areas. Historical data are retained as these data issues are being rectified.

## Environment and Access

This page is left intentionally blank for printing.

## Environment and Access

## I. 1 District Service Area and OCC Racial and Ethnic Diversity

The ethnic breakdown of OCC students in fall 1990 closely matched the ethnic/racial breakdown of OCC's service area. Since then, OCC's ethnic/racial composition has been changing relative to the district service area. By fall 2020, census data showed OCC's student to include a greater percentage of Hispanic or Latinx students than the adult population in the district's service area. This has also meant a smaller percentage of White students relative to the district's service area. The growing number of out-of-district students attending OCC could be contributing to these changes.

Comparison of Ethnic Distribution of CCCD Service Area and OCC Enrollment Adult Population (18 and Up)

Table I.1: Comparison of Ethnic Distribution of CCCD Service Area and OCC Enrollment Adult Population (18 and Up)

| Percent | OCC Fall 2021 | Adult Population CCCD Service Area |
| :--- | :---: | :---: |
| Hispanic or Latinx | $34.0 \%$ | $24.5 \%$ |
| Non-Hispanic or Latinx | $67.3 \%$ | $75.4 \%$ |
| American Indian or Alaska Native | $0.3 \%$ | $0.4 \%$ |
| Asian | $26.5 \%$ | $24.5 \%$ |
| Black or African American | $1.8 \%$ | $1.3 \%$ |
| Two or more | $5.1 \%$ | $3.9 \%$ |
| Unknown | $2.4 \%$ | $0.0 \%$ |
| White | $30.0 \%$ | $45.3 \%$ |

Per United States Department of Education guidelines, educational institutions will be required to collect racial and ethnic data using a two-part question. The first question is whether the respondent is Hispanic or Latinx. The second question is whether the respondent is from one or more races.

Source: U.S. Census U.S. Census QuickFacts The 1990 and 2000 comparison of district service area and OCC ethnic diversity can be found in the 2000-2001 and 2002-2003 versions of the OCC Atlas (accessible on the Institutional Effectiveness OCC Portal page under Institutional Research).

## I. 2 Legal Residency Status

Legal residency refers to a student's legal residency status for registration fee purposes. It does not address where the student is currently living while attending OCC (see section I.3). OCC students are about evenly split between those whose legal residence is within the CCC district and those outside of it. The proportion of students who are California residents living within the District Service Area has decreased steadily from $48.8 \%$ in fall 2011 to $45.8 \%$ in fall 2021. The proportion who are California residents and live outside of the district has been consistent during this time and was $46.1 \%$ in fall 2021. Since the mid-2000's, OCC has observed steady enrollments of students coming from out of state (approximately $5.9 \%$ ). The percentage of non-US students has historically been approximately $2 \%$ until fall 2006. Since then, it has trended upward due to the College's international efforts, and in fall 2019 it stood at 6.5\%.

Please use caution when comparing the data below with the District IE report. Data for the Out of State and NonUS Citizen are calculated differently.

OCC Student Enrollment by Legal Residency Status

Source: OCC MIS Census Data, Fall 2011-Fall 2021

## I. 3 Student Enrollment by District Boundaries

Based on physical residency (where the student lives while attending OCC), about half of our students live in cities within district boundaries. District boundaries are determined by the state. The proportion of within-district students were consistent in fall 2011 (50.6\%) and fall 2021 (50.1\%).

OCC Student Enrollment by District Boundaries (Zip Codes)

Table I.3: All OCC Student Enrollment by Zip Code (Within/Outside District Boundaries) Fall 2011 - Fall 2021

| Number | $\begin{gathered} \text { Fall } \\ 2011 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2012 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2013 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2014 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2015 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2016 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2017 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2018 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2019 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2020 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2021 \end{aligned}$ |

NOTE: Data reflects where students live rather than legal residency.
Source: OCC MIS Census Data, Fall 2011-Fall 2021
Due to a change in district data systems, a large number of students with unreported zip codes were observed from fall 2008 through fall 2012.
*Percentages of within and outside district figures were adjusted when omitting the 'Unknown Zip' student counts from the cumulative total.

## I. 4 OCC Credit Students' City of Residence

$84.5 \%$ of OCC students live in Orange County, with $49.4 \%$ who live within the CCC district and $35.1 \%$ who live outside of it. The percent of students living within CCCD's service area has fluctuated in the past ten years from 47.2\% (fall 2011) to 52.0\% (fall 2019) to 49.4\% (fall 2021). The percentage of students residing in Orange County but are out of district has decreased from $38.2 \%$ in fall 2011 to $35.4 \%$ in fall 2021. The percentage of students who do not reside in Orange County has been increased in the past ten years from 11.2\% in fall 2011 to $14.7 \%$ in fall 2021

### 1.5 Orange County High School Graduates

Projections of Education Statistics to $2028{ }^{1}$ is projecting minimal-to-no growth of high school graduates in California until 2028-29. About 20.4\% of Orange Coast College's students each semester are first-time freshman (recent high school graduates or not a transfer from another college). Logically, the number of high school graduates each year impacts enrollment trends at OCC. The major high school districts (within the CCCD district) that feed into OCC are Huntington Beach Union, Newport-Mesa Unified, and Garden Grove Unified. The number of graduates from these districts has increased over the past ten years-though recent trends show only moderate growth and a decline in 2017. The major high school districts sending students to OCC outside the CCCD boundaries were Santa Ana Unified and Irvine Unified. The 2019-2020 high school graduate data will be available in December 2020.

### 1.6 Orange County Unemployment Rates

Despite the reported link between community college enrollment and local unemployment rates, there has not been a clear correlation between these two figures at OCC over the last 10 years, with the exception from 20102012, when enrollment declined parallel to the unemployment rates. From 2012 through 2019, unemployment has continued to decline steadily while OCC enrollment has remained steady. Unemployment rates for 2021 declined to $6.0 \%$ annual and OCC continued to decline in enrollment.

## Student and Enrollment Trends

This page is left intentionally blank for printing.

## II. Credit Student and Enrollment Trends

## II. 1 OCC Credit Headcount and Seat Count Trends

Headcount enrollment represents the total number of students attending OCC (i.e., each student counted only once). Seat count enrollment represents the total number of courses in which students were enrolled. For the 2021/2022 academic year, headcount and seat count decreased $5.2 \%$ and $11.2 \%$, respectively.

## II. 2 OCC Credit FTES Generated Within the Fiscal Years

OCC credit FTES generated (resident and non-resident FTES combined) has fluctuated over the past 10 years. Data prior to 2012/2013 reflect the FTES submitted to the State Chancellor's Office rather than actual FTES generated. Therefore, summer FTES variation could be due to the district's flexibility in reporting summer semester FTES across multiple fiscal years. FTES data since 2012/2013 reflect FTES generated each term. The observed declines since the college's ten-year high in 2007-2008 are partially masked by the large increases in section/course fill rates. As the state budget decline reversed, more sections have been offered and an increase in FTES resulted. In 2019-2020, FTES decreased by $-11.6 \%$ for fall and $-7.7 \%$ for spring terms from the prior year. In March 2020, the College closed its physical campus and transitioned to emergency remote learning due to the Covid-19 pandemic.

FTES is provided from DIS Program Review Enrollment Cube and may vary from reported 320 figures.
*Data from 2012/2013 were revised from prior versions of the OCC Atlas to reflect a change in data source. For historical trends, please refer to prior versions of the OCC Atlas.

## II. 3 Credit Race/Ethnicity

There was a large increase in the number of OCC students who identify as Hispanic or Latinx over the last 10 years. Proportionally, the percentage of Hispanic or Latinx students has increased from 28.1\% of students in fall 2011 to 34.1\% in fall 2021. The proportion of students who identify as White declined during this period from $37.8 \%$ to $30.1 \%$. The Asian student population have experienced small increase since fall 2011. The Black or African American student population has remained relatively constant over the past ten years.

*Asian includes individuals who identified as Asian, Filipino, and Native Hawaiian or Pacific Islander. Future publications will review the appropriateness of this categorization.

## II. 4 Credit Age

OCC is a college of young adults. The largest age group consisted of those under 21 years ( $45.5 \%$ ). The proportion of this group remained relatively stable over the last 10 years. The proportion of students between the ages of 21 and 30 years increased somewhat during this time, while the proportion of those over 30 years-old has slightly declined.

## II. 5 Credit Gender

Since 2011, the male and female population stayed consistently similar however starting in fall 2020, the female student population rose higher than the male population. In fall 2021 , the OCC population was $50.9 \%$ female and 47.4\% male.

* Unknown students were omitted from the percent calculations from fall 2008 onward due to the district's transition to our district data system.
** Data for Non-Binary students represents 10 or fewer students, therefore it has been suppressed.
Summer 2019, the state added the requirement of non-binary gender.

## II. 6 Admission Status

The majority of OCC students in fall 2021 are continuing students (62.0\%), a proportion which has stayed consistent over the last 10 years. The proportion of other types of students have tended to remain stable over this time.

## II. 7 Citizenship

US Citizens accounted for most students enrolled in fall 2021, although over the past 10 years their proportion decreased from $74.6 \%$ to $59.2 \%$. Due to the college's international efforts, the percent of international students on student visas doubled in the past ten years from $2.8 \%$ in fall 2011 to $5.2 \%$ in fall 2021.

Other Non-US Citizen are defined as Temporary Resident, Refugee, and Other Status.

## II. 8 Educational Attainment

In fall 2021, the highest degree earned at enrollment by a large majority of OCC students (87.0\%) was high school diploma or equivalent (including foreign certificates). Smaller proportions of students have earned other types of degrees: $2.8 \%$ earned an associate degree, $8.3 \%$ a bachelor's degree or higher, $0.9 \%$ of students have not earned a HS diploma, and $1.0 \%$ are currently enrolled in a K-12 program.

Source: OCC MIS Student Enrollment data, Fall 2010-Fall 2020

* Unknown students were omitted from denominator when calculating the percentages of student educational attainment beginning 2010.
** Data inconsistencies observed by the large number of unknown/unreported data and small number of associate degree students in fall 2009 were due to a migration in student data systems. As a result, these data are not reported. Unknowns from fall 2010 onward were removed from percent calculations. The data should be interpreted with caution.
At the time of publication, missing data issues were not resolved, and the Office of Institutional Effectiveness is continuing to research this issue.
For more information, please contact the Office of Institutional Effectiveness.
II. 9 OCC Assessment

UNDER CONSTRUCTION - DATA WILL BE UPDATED IN 2023

## II. 12 Educational Goal for Credit Students

The educational goal is the student's intent listed on their initial OCC application. Most OCC students stated their goal was to transfer in fall 2021 ( $60.8 \%$ ). Students who stated vocational goals for their educational goals showed the largest increase in the past 10 years, increasing from $15.3 \%$ to $18.8 \%$.

Educational Goals are defined as:

1. Transfer Goals: $B A / S$ with or without an $A A / S$ degree.
2. Vocational Goals: AA/S without transfer, AA/S Vocational, Vocational Certificate, Career Plans/Goals, New Career/Job Skills, Advance in Current Job, or Maintain Certificate/License.
3. Enrichment Goal: Ed Development, Improve Basic Skills, HS Diploma or GED, Move from NonCredit to Credit Coursework, or Four-Year Students Taking Requirements.
4. Undecided/Unknown Goal: Undecided on Goal or Uncollected.

To see a further breakdown of the individual goals, please contact the Office of Institutional Effectiveness

## II. 13 OCC Enrollments by Type of Credit Course

Transfer, non-vocational courses comprised the largest group of enrollments and stood at $79.3 \%$ in fall 2021. Since the fall 2009 distribution reset, a trend toward a higher percentage of transfer, vocational, and basic skills courses being offered is seen.

## II. 14 OCC Credit Full-Time/Part-Time Enrollment

The majority of OCC students were enrolled part-time (less than 12 units per semester) in fall 2021 ( $64.0 \%$ ), which was higher when compared to fall 2011 ( $58.0 \%$ ). As such, the proportion of students attending full-time were comparable in the same period.

## II. 15 OCC Credit Student Headcount Enrollment Day/Evening/Weekend/Online Classes

OCC students take courses at a wide variety of times and formats. Students only taking day classes has consistently accounted for the largest student group from fall 2011 (63.7\%) to fall 2021 (7.9\%). In fall 2020, COVID-19 skewed the data as students were moved to online classes only. Nine-year trends show a decrease in the number of students taking evening classes. This statement excludes the Fall 2020 data.

## II. 16 OCC Credit Seats by Day / Evening / Weekend / Online Courses

The majority of OCC classes are scheduled online (LIVEONLINE) ( $45.5 \%$ in fall 2021). The proportion of day classes has trended upward to $76.8 \%$ in 2019 until the COVID-19 pandemic drastically decreased day classes to $7.3 \%$ in 2021. LIVEONLINE has the highest percentage of online enrollments (45.5\%) and Online courses increased to $32.8 \%$ in 2021. Hybrid course enrollments also increased to 13.4\% in Fall 2021 from 1.4\% in Fall 2011.

## II. 17 Credit Sections Offered by Day / Evening / Weekend / Online Status

The majority of OCC sections are scheduled during the day ( $73.7 \%$ in fall 2019). The majority of Fall 2020 courses were changed to online ( $85.5 \%$ ) due to Covid-19 closures. The proportion of day sections has trended upward from 2011 to 2019, while the proportion of evening and weekend sections have trended downwards ( $26.9 \%$ fall 2009 and $20.8 \%$ fall 2019). Fall 2020 was during the COVID-19 pandemic, therefore the majority of on campus courses were changed to online and/or hybrids.

Section counts are unduplicated and do not reflect multiple meeting patterns. Sections are categorized by their primary meeting pattern.
Number of sections only shows one aspect of scheduling and offerings.
Sections offered need to be looked at in conjunction with other enrollment characteristics, such as class size (e.g., large lecture) and total enrollment.

## Non-Credit Student Trends

This page is left intentionally blank for printing.

## III. Non-credit Student Trends

Orange Coast College started a new non-credit Adult Education program in Fall 2018, which partners with local adult schools and community organizations to help adults to transition to college.

## III. 1 City of Residency

In Fall 2018, OCC began enrolling students into non-credit courses. In Fall $202189.2 \%$ of OCC non-credit students live in Orange County. The majority of those live within the CCC district (63.9\%).

## III. 2 OCC Non-credit Headcount and Seat Count

Non-credit headcount enrollment represents the total number of non-credit students attending OCC (each student counted only once). Seat count enrollment represents the total number of courses in which students were enrolled.

Table III.2a: OCC Non-credit Headcount and Seat Count Enrollments at First Census, Fall Term

| Number | Fall 2018 | Fall 2019 | Fall 2020 | Fall 2021 |
| :--- | :---: | :---: | :---: | :---: |

## IV. Student Outcomes

## IV. 1 OCC Effectiveness Indicators and Targets

Orange Coast College's core indicators are the critical outcomes that illustrate progress towards meeting its goals. Core indicators supporting the goals and strategic objectives are defined with performance targets to gauge the extent to which the College is making progress. The core indicators are organized by the College's values and goals (C-L-A-S-S).

CLASS stands for Community, Learning, Access, Stewardship, and Student \& Employee Engagement.
To access college's latest analysis on its progress towards its core indicators, click on the Core Indicators and Institution-Set Standards Report below.

## CORE INDICATORS updated May 20 2021.pdf

OCC Atlas 2019-2020 January 2021.pdf
OCC Vision for Success Overall and DI Targets Infographic updated 5-12-2021 ada.pdf 2019 SEA Targets Summary Revised 11-18-2019 ada.pdf

Additional OCC reports are located on the OCC website at Documents \& Reports. These reports cover Institutional Research, Planning \& Decision-Making, Educational Master Plan 2016-2021, and Midterm Program Review.

## IV. 2 Overall Grade Distribution

Most OCC students were successful in their classes, with $73.5 \%$ receiving a passing grade (e.g., A, B, C, or P) in fall 2021. The percentage of A grades has been trending up over the last 10 years and stood at $40.2 \%$ in fall 2021. The percentage of F grades has been steady over this time and stood at $9.4 \%$ in fall 2021.

## IV. 3 GPA of OCC Students by Student Enrollment Status

The average term GPA of OCC students has increased slightly over the last 10 years and in fall 2021 stood at 2.85, up from 2.72 in 2011. Full-time students carried a higher GPA on average than part-time students (2.92 vs. 2.76, respectively).

## GPA for OCC Students by Student Enrollment Status

## IV. 4 Overall Credit Success and Retention Rates

OCC's definitions for success and retention are the same as those used by the State Chancellor's Office:
Success is defined as a passing grade ( $A, B, C, I A, I B, I C, I P, I P P$, and $P$ ). Those who are not successful receive the following grades: $D, N P, F, I$, and $W$. The success rate is calculated by dividing the number of successful students by the number of students enrolled at census.

Retention denotes those who remain in a class and includes those who may or may not have been successful. Thus, retention includes the following grades: $A, B, C, P, D, N C, F$, and $I A, I B, I C, I D, I F, I N P, I P P, N P, I P$, and $M W$. The retention rate is calculated by dividing the number of students retained (excluding those who withdrew with a 'W') by the number of students enrolled at census.

Commensurate with overall grade distribution trends, most OCC students continue to be successful in their classes. OCC's success rate remained constant in the past 10 years, landing on $73.5 \%$ in fall 2021. Retention rates hit a ten year high in fall 2011 ( $88.6 \%$ ) but have since declined slightly to $87.2 \%$ in fall 2021. This may have been affected by the slight increase in withdrawals due to a change in the withdrawal deadline that went into effect in fall 2012.

Table IV.4: OCC Credit Success and Retention Rates

| Performance | $\begin{gathered} \text { Fall } \\ 2011 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2012 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2013 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2014 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2015 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2016 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2017 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2018 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2019 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2020 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2021 \end{gathered}$ |

## IV. 5 Overall Credit Success and Retention Rates by Academic Year

Most OCC students continue to be successful in their classes. OCC's success rate has slightly increased from 74.1\% in 2011/2012 to $75.1 \%$ in 2021/2022. Retention rates hit a ten-year high in 2011/2012 (88.4\%) but have since slightly declined to $87.4 \%$ in $2021 / 2022$. This may have been caused by an increase in withdrawals due to a change in the withdrawal deadline that went into effect in fall 2012.

## IV. 7 Retention Rates by Academic Year by Modality

Retention rates are very similar across traditional (86.9\%), online (88.6\%), and hybrid (86.6\%) modalities. In spring 2020, the COVID-19 pandemic occurred, and a high number of student withdrawals were observed as the college transitioned to emergency remote learning environments mid-semester.

## IV. 8 Success Rates by Course Type

In fall 2021, OCC student's success rates were highest for CTE courses (77.1\%), followed by UC and CSU Transferable courses (73.0\%) and Basic Skills courses (62.2\%). The rates for UC and CSU transferable and CTE courses have been trending slightly upwards over the last 10 years, with considerable variability. While Basic Skills courses has decreased.

## IV. 9 Retention Rates by Course Type

In fall 2021, OCC student's retention rates were highest for CTE courses (89.6\%), followed by UC and CSU transferable courses (87.0\%) and Basic Skills courses (78.5\%). The rates for Basic Skills and UC \& CSU courses have been trending downwards over the last 10 years, with considerable variability.

Some CTE courses may also be UC/CSU transferable, so these categories and related data are not mutually exclusive

## IV. 10 Student Academic Standing

In fall 2008, academic standing categories changed. Students who did not accrue at least 12 units were not assigned an academic standing. Prior to 2008, these students were included in the good standing category. Trends are noted from fall 2011 to present. There has been an increase in students in good standing from fall 2011 (74.8\%) to fall 2021 (84.1\%).

OCC Credit Student Probation Status

Table IV.10: OCC Student Academic Standing

Source: MIS Student Enrollment and Student Basic data, Fall 2011-Fall 2021
*No Academic Standing Assigned: Beginning spring 2008, students are not assigned an academic standing until they have accrued 12 or more semester units. Calculations for percentage table are based off of a modified denominator where total headcount excludes counts for the "no academic standing assigned" category.

## IV. 11 AA/AS Degrees and Certificates Awarded

The total number of AA/AS/AA-T/AS-T Degrees awarded increased from 1,589 in from 2011/2012 to 2,370 in 2021/2022. The addition of the AS degree in 2006/2007 and the AA/AS-Transfer degrees in 2011/2012 increased the total number of associate degrees awarded. In 2021-2022, Orange Coast College was ranked 28th in the state for AA-T/AS-T degrees awarded ( 2,366 ). ${ }^{2}$ Certificates of Achievement experienced more than a $251 \%$ increase between 2013/2014 and 2014/2015 when the CSU Breadth or IGETC certificate was introduced. The proportion of Certificates of Skills/Specializations declined in this 10-year period. Non-Credit Awards were new in 2018/2019and comprised 1.1\% of awards and certificates awarded. In 2021/2022, Non-Credit awards were $1.0 \%$ of the awards and certificates awarded.

${ }^{*}$ In 2019/2020 one division transition its recording of Certificates of Skills or Specializations and was not able to complete the transition. That division was unable to provide its award numbers. Certificates of Skills or Specializations are awarded for programs requiring minimal units. Data was updated on April 1, 2013 to include AA-Transfer Degrees and to correct data.

[^4]
## IV.12 OCC Transfers to Four Year Institutions

The majority of OCC transfers are to the CSU and UC systems. Transfers to UC institutions have decreased 18.7\% from 2011-12 (578) through 2021-22 (470), transfers to CSU institutions have decreased $18.1 \%$ in the same time period ( 1,424 in 2011-12 to 1,116 in 2021-22). In 2021-2022, OCC ranked $13^{\text {th }}$ in CSU transfers statewide, $7^{\text {th }}$ in UC transfers statewide, and $9^{\text {th }}$ in overall transfers to CSU and UC schools combined. Compared to the previous year's totals, the 2020-21 results reflect a stable trend in total transfers. Despite the decreases, OCC's rankings have remained strong.

For students transferring from OCC to other 4-year universities, there has been a shift from in-state private institutions (down from 237 to 187 in 2021-2022) to out-of-state institutions (down from 289 to 47 in 2021-2022) over this ten-year period. The 2021-2022 data is not currently available the electronic version of the Atlas will be updated when the data becomes available.

## V. Student Equity Outcomes

## V. Student Equity Plan

The Student Equity Plan (State of CA Education Code 78220) is a standard method across all California Community Colleges that ensures equal educational opportunities and to promote student success for all students, regardless of race, gender, age, disability, or economic circumstances. In the 1990s, the California Community Colleges Board of Governors legislated that colleges adopt a student equity plan to ensure that historically underrepresented student groups have an equal opportunity for access, success, and transfer in higher education. More recently, in 2014, the Chancellor's Office charged colleges to review and update student equity planning and tied the efforts to formal funding. As such, each college was instructed to conduct a self-evaluation of student equity outcomes on their campus and create a plan for improving successful outcomes for all students.

Five metrics are used to measure the student pipeline. Those metrics include

- Successful Enrollment
- Percent of applicants who enroll
- Retention
- Percent of students retained from fall to spring
- English/Math Completion
- Proportion of students completing transfer-level Math \& English in their first academic year
- Transfer
- Number of students who transfer to UC, CSU, private \& out of state schools
- Completion
- Number of students who earn a credit certificate (over 18 units) or associates degree

## Summary of Target Outcomes for 2022-25

Successful Enrollment

- Black or African American
- 1- year outcome: Alongside Umoja and key programs with high participation from African American students, explore current and new ways of engaging the Black/ African American community. Asses front-end and onboarding services that incorporate populations' needs.
- 2-year outcome: Implement outreach and onboarding structures according to assessments.
- 3-year outcome: Increase the number of students who successfully enroll by $2 \%$ each year.

## Completed Transfer-Level Math \& English

- First Generation College Students
- 1-year outcome: Work with Guided Pathways planning efforts to establish necessary resources.
- 2-year outcome: Align efforts with SEMP and Guided Pathways.
- 3-year outcome: Increase the number of students completing English/Math by 2\% each year.
- Hispanic or Latino/a/x
- 3-year outcome: increase the number of students completing English/Math by 2\% each year.

## Persistence: First Primary Term to Secondary Term

- First Generation College Students
- 1-year outcome: Inventory campus support programs working with first-generation students and formulate a plan for collaboration and support.
- 2-year outcome: Assess additional programmatic needs for support of the population.
- 3-year outcome: Increase the number of students retained by 2\% each year.

## Transfer

- First Generation College Students
- 1-year outcome: Work with Guided Pathways planning efforts to establish necessary resources/
- 2-year outcome: Align efforts with SEMP and Guided Pathways.
- 3-year outcome: Increase the number of students transferring by 2\% each year.

## Completion

- First Generation College Students
- 1-year outcome: Work with Guided Pathways planning efforts to establish necessary resources.
- 2-year outcome: Align efforts with SEMP and Guided Pathways.
- 3-year outcome: Increase the number of students completing by 2\% each year.

## OCC Student Equity Trends

This section presents an overview of the campus-based research conducted on the Student Success Metrics for Orange Coast College. To assess equity within each metric, a disproportionate impact (DI) analysis was conducted. For these analyses, DI is defined as a success or completion rate that is less than $80 \%$ that of a reference group or the overall group rate; in other words, "the $80 \%$ rule" has been applied.

Data for DI groups were categorized by ethnicity and special groups (e.g., Disability, Economically Disadvantaged, Homeless, First-Generation, Foster Youth LGBTQ+, and Veterans) and disaggregated by gender.

The results of the analyses are visually summarized in the Student Equity Dashboard (presented on the following page) for easy identification of impact across and within indicators and subpopulations.

- Ethnicity: Disproportionate impact observed for Black or African American students in Access, English/

Math, and Completion. Filipino and Hawaiian/Pacific Islander students showed DI in Access and Completion. Hispanic or Latino/a/x students showed DI in every metric except for Access. Lastly, White students showed DI in Retention.

- Special Groups: For students in special groups, disproportionate impact was observed in disabled students Completion, Homeless students showed DI in English/ Math, First Generation students showed DI in every metric except for Access. Foster Youth displayed DI in English/Math and Completion, LGBTQ+ students showed DI in Retention and Completion and lastly, DI was observed for Veterans in English/Math.
- Gender: Disproportionate impact was observed in Black or African American females in Access and English/Math, Hawaiian or Pacific Islander males in Completion, Hispanic or Latino/a/x males in Retention, English/Math, and Transfer. DI was also observed in White males. For special groups, First Generation males experienced DI in Retention and Transfer, Foster Youth males showed DI in English/ Math and Completion, LGBTQ+ females showed DI in retention while LGBTQ+ males showed DI in Completion and lastly, female veterans experienced DI in English/ Math.

## VI. Employee Data

## VI. 1 OCC Staffing

The total number of employees has increased $11 \%$ between fall 2011 and fall 2021 (from 1,000 to 1,110). Disaggregation reveals that all employee classifications have experienced increase in the past ten years.

Table VI.1: OCC Staff Employment Trends Comparison

NOTE: Figures represent total number of employees as of October 15th of the stated year (not cumulative figures for the entire semester)
These figures represent headcounts only and do not reflect other workload measures such as faculty overload or staff overtime
Headcounts for classified staff do not differentiate between full-time and part-time status
Data since fall 2009 is presented for consistency in reporting after the transition to the Banner data system.

## VI. 2 OCC Staffing Trends by Gender

OCC full-time faculty have tended to be evenly split among males and females over the last 10 years, while there has been a slightly higher percentage of female part-time faculty. There has been a stable tendency for classified professional to be female ( $58.8 \%$ female vs. $41.2 \%$ male in fall 2021). Classified managers by fall 2021 males and females were equal ( $50.0 \%$ ). The gender ratio among educational administrators has been more variable, possibly due to small numbers. In fall 2021 they were composed of $51.7 \%$ male and $58.8 \%$ female. The state did not start collecting a $3^{\text {rd }}$ gender grouping of non-binary until summer 2019.

## VI. 3 Women Employed by Employee Category

Examining staffing data by gender across employee categories demonstrates classified professionals have consistently had the highest percent of women employed (approximately 55-59\%), followed closely by full-time (approximately $48-52 \%$ ) and part-time faculty (approximately 52-53\%). Educational administrators have a lower percent of women compared to the other groups. Since 2013, the percentage of female educational administrators has been increasing and now stands at $48.3 \%$. In fall 2021, female classified managers saw an increase to $50.0 \%$.

Table VI.3: Percent of Women by Employee Category

| Women | $\begin{aligned} & \text { Fall } \\ & 2011 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2012 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2013 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2014 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2015 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2016 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2017 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2018 \end{gathered}$ | $\begin{gathered} \text { Fall } \\ 2019 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2020 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2021 \end{gathered}$ |

## VI. 4 OCC Staffing Trends by Ethnicity/Race - Faculty and Administrators

Over the past ten years, the ethnic/racial makeup of faculty and educational administrators has remained relatively stable. The majority of current (fall 2021) OCC full-time faculty, part-time faculty, and educational administrators are White ( $69.3 \%, 62.9 \%$, and $79.3 \%$, respectively). Compared to the adult population of the CCCD service area, there are less Hispanic or Latinx, Asian, Unknown, and American Indian or Alaska Native across OCC faculty and administrators. (see section 1.1).

## VI. 5 OCC Staffing Trends by Ethnicity/Race - Classified Professional and Managers

In 2021, a little less than half of all classified professionals were White (39.0\%), 27.3\% were Hispanic or Latinx, and $22.1 \%$ were Asian. In recent years, classified professionals have become more diverse, with decreasing percentages of White and increasing numbers of Asian and Hispanic or Latinx employees. The classified professionals have a similar ethnic/racial make-up as the adult population of the CCCD service area.
$46.4 \%$ of classified managers were White in 2021. There has been an increasing percentage of Hispanic or Latinx managers from fall 2011 (20.0\%) to fall 2021 (32.1\%).

## VI. 6 Ethnic/Racial Minorities by Employee Category

Examining the percent of people of color at OCC by employee category shows that over half of classified professional employees ( $61.0 \%$ in 2021) are people of color. All other groups employ people of color at rates of at least approximately $8 \%$ lower than classified professionals. All employee groups have increased in the percent of people of color since fall 2011.

## VI. 7 OCC Staffing Trends by Age - Faculty

The majority of full-time faculty ( $53.0 \%$ ) were over the age 50 years in 2021, while part-time faculty were somewhat younger ( $55.7 \%$ were under 50 ). The largest changes for full-time faculty over the last 10 years have occurred for the 5059 age group ( $-6.6 \%$ decrease) and the 40-49 age group ( $6.2 \%$ increase). For part-time faculty, the largest changes occurred for the 40-49 age group which increased $5.6 \%$ in this time period.

## VI. 9 OCC Staffing Trends by Age - Administrative

The majority of educational administrators were age 50 years or older ( $44.8 \%$ in fall 2021), which has remained consistent over the past ten years. However, the proportion of administrators in the 30-39 age group has increased to 17.2\%.

Table VI. 9 Age of Educational Administrators

| Percent | $\begin{aligned} & \text { Fall } \\ & 2011 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2012 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2013 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2014 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2015 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2016 \end{aligned}$ | $\begin{gathered} \text { Fall } \\ 2017 \end{gathered}$ | $\begin{aligned} & \text { Fall } \\ & 2018 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2019 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2020 \end{aligned}$ | $\begin{aligned} & \text { Fall } \\ & 2021 \end{aligned}$ | $\begin{gathered} \text { Change } \\ \text { 2011- } \\ 2021 \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
