

DIGITAL DESIGN

Hort A116 Summer 8 Weeks: Jun 22 - Aug 14
Tue, Wed, Thu: 5:00pm - 10:10pm

COURSE DESCRIPTION

This course provides an introduction to digital techniques while explaining the processes associated with designing the landscape.

In addition, this course guides the student through site analysis and conceptual design to the production of detailed plans and construction documents using digital tools.

This class demonstrates the use of standard digital tools in the landscape design industry such as AutoCAD and SketchUp.

STUDENT LEARNING OUTCOMES

- Ability to navigate 2D and 3D design software programs.
- Measure and evaluate landscapes in order to develop landscape base maps and site plans.
- Produce biddable construction documents.

CRN: 12970
Room: HORT 102
