Item 5: GE Requirements for Allied Health Students/Discussion (Attachment A) (5 minutes)

Item 6: Adjournment

The recent GE changes negatively impacted students who were deemed program ready in 3 allied health programs prior to 2025 but have been on the waitlist long enough to lose catalog rights. Under the current rules, they will need to take 1-2 GE courses in addition to the work already completed to be able to complete their degree.

To assist these students (and to prevent similar future situations) counseling has worked with A&R to bring forward a revision to catalog language related to allied health and catalog rights so that program ready students will be protected from catalog changes to GE that occur after they are made program ready but are on the waitlist for the program. The addition is in red below.

Current Catalog Language:

"Catalog Rights: Orange Coast College issues a new catalog each year and may issue addendums to reflect necessary changes. The information published in the catalog is in effect for the academic year identified in the catalog edition, beginning with the summer semester and concluding with the spring session. Catalog rights are based on enrollment in classes in primary terms (fall and spring) only. Courses required for a specific degree or certificate, or general education, may change from one catalog to the next and, therefore may change during a student's period of enrollment. Catalog rights, established when a regularly admitted student first takes classes at the college in a primary term, protect the student from being held to additional requirements that may be added to a later catalog. For the purposes of meeting degree or certificate requirements, as long as they have maintained continuous enrollment, students may elect to meet the requirements of either:

1. The catalog that was in effect for the primary term during which they began taking courses at Orange Coast College, or
2. Any catalog that is or has been in effect during the time that they have maintained continuous enrollment before graduation, or
3. The catalog that is in effect at the time they file a petition for a degree or certificate.

Catalog rights are not in effect when a program requires that a student complete specific courses within an established time frame or when career and technical education requirements change due to industry standards. Catalog rights do not apply to the certification of general education (GE) for transfer; courses used for GE certification must be on an approved GE Plan at the time they are taken.

Continuous Enrollment: Continuous enrollment is defined as being enrolled in at least one course during a calendar year and receiving an A, B, C, D, F, P, NP, I, IP or W at Orange Coast College. If there is a break in enrollment, the student will be held to the new requirements listed in the catalog at the time of re-enrollment. Absence from a summer session is not considered a break in enrollment. In extenuating circumstances, a student may submit a request for an exception to the Director of Enrollment Services for consideration to retain previous catalog rights.

For Allied Health Programs that maintain a waitlist of one year or more, if there is a break in enrollment that is the result of a program waitlist, the student will be classified as maintaining continuous enrollment for purposes of satisfying GE requirements as of the time that they receive their Program Readiness Date and until such time that they are admitted to the program. If a student drops from an Allied Health Program waitlist or declines admission, their continuous enrollment will no longer be in effect for purposes of maintaining catalog rights.
